

Cellnex Telecom awarded the prize for the Best Business Operation

Barcelona, 4 December 2015. - Cellnex Telecom, Europe's leading independent operator of wireless communications infrastructures, has received the award for Best Business Operation at the eEconomista Awards at the 5th Edition of the "Economy Night".

Cellnex Telecom received the "Best Business Operation" award after the success of its IPO last May, in which a 66% stake in the company was placed at an initial price of € 14. Shares are currently trading at around € 17.

The eEconomista "Economy Night" awards were created in 2011, with the institutional support of La Caixa. The initiative aims to reward the professional recognition, prestige, support and promotion of the activity generated by the business and financial sector. The event is particularly important this year, since it has turned into an appeal for the strength of the economy and a commitment to speedy recovery by stimulating business activity.

The awards are held once a year and are granted to professionals, institutions, organisations and companies based in Spain that have made outstanding contributions in one of the designated categories.

Editors' Note

About Cellnex Telecom

Since it acquired the portfolio of telecommunications towers from WIND in Italy last March, Cellnex Telecom has become Europe's leading independent operator of wireless communications infrastructures, with a total portfolio of 15,140 towers.

Cellnex classifies its activities into three areas: Mobile telephony infrastructures; audiovisual broadcasting networks; and solutions for security and emergency service networks, smart cities and the Internet of Things (IoT).

In 2014, company turnover was € 436 million and gross operating profit (EBITDA) stood at € 178 million. 57% of total revenue was generated by broadcasting infrastructure (€ 250.35 million); 24% by mobile telephony infrastructures activity (€ 106.5 million) and 18% by network services activity (€ 79.16 million).
