

Maintained Power >

Keeping your equipment operational during mains failures and outages

Our Maintained Power service provides emergency power restoration when you need it most. Whether the outage is planned or unplanned, we will deploy a generator to get your equipment back up and running.

Cellnex' Maintained Power service offers a fully managed temporary power solution for your site. In the event of a power failure, simply call our 24/7 service desk and we'll get power restored within 4 hours.

An initial set-up process ensures total readiness with contingency plans implemented for every site.

Our ring-fenced fleet of generators are strategically located throughout the UK, to ensure a speedy response every time.

A simple annual fee – based on your requirements – means there are no call-out fees.

Cellnex will manage the complete process, keeping you updated every step of the way, to give you peace of mind knowing your site will be fully operational with the minimum of disruption.

“ Our Maintained Power service gets your equipment back on air in the event of a mains supply failure ”

Case study example

Your power provider may occasionally need to perform upgrades to the supply of the site requiring a power outage.

Cellnex' Maintained Power service can be activated to keep your equipment running while this essential work takes place.

We will deliver and install the generator before the scheduled power outage, re-fuel if necessary, depending on length of service required, and then disconnect and remove as soon as the mains supply is reinstated.

If there is an unplanned power outage caused by a storm or other event, Cellnex will deploy a generator to provide emergency power.

This will mean minimum downtime for your customers and ensure the smooth running of your network.

7 depots

at strategic locations throughout the around UK

24/7 cover

Around the clock service

4h restore

SLA Power restored to your equipment within 4 hours*
