

Europe's Leading Wireless Telecommunications Infrastructure Provider

Currently operating across Europe, we give coverage to over 250 million end users with services including data, networks, radio and TV broadcasting.

As an independent infrastructure operator, our goal is to create an efficient, neutral, quality telecommunications platform with innovative management to drive digitalisation in Europe.

We aim to create value for society, our customers, shareholders and every stakeholder group through an ethical attitude based on tolerance, respect and cooperation in Environmental, Social and Governance matters.
