

## Cellnex strengthens its position as a climate leader in the CDP A-list

For the 7th consecutive year Cellnex earns CDP “A List” recognition, and enhances its Science-Based Targets with a Net-Zero Goal

---

Barcelona, 9 January 2026.- Cellnex reaffirms its climate leadership as the only TowerCo to secure a place on CDP’s A List —the Gold Standard in Climate Reporting— for seven consecutive years.

Cellnex is firmly committed to **decarbonising** its operations, having **reduced** global Scope 1, 2 and 3 emissions **by over 50% since 2020** through **renewable energy procurement**, long-term **Power Purchase Agreements (PPAs)**, **on-site solar generation** and robust **engagement** with **suppliers** and **customers**. Cellnex is also **recognised by CDP** as **Supplier Engagement Leader**, as one of the top performers worldwide in how it works with its suppliers to tackle climate change.

Reaffirming its commitment to climate action, Cellnex **has strengthened its Net-Zero roadmap, validated by SBTi**: achieving a **70% reduction in Scope 1 and 2 emissions by 2030**, sourcing **100% renewable electricity by 2025**, and mobilising **82% of suppliers and customers to set science-based targets**, with the **ultimate ambition of Net-Zero by 2050**.

Alicia Fernández del Viso, Sustainability Director, remarks: *“For us, the CDP A-list recognition is the result of a collective effort across the company—led by our CEO and senior management.”* In addition, Yolanda Romero, Head of Environment and Climate Change, highlights: *“To achieve climate leadership requires strong partnerships with our suppliers and customers. At Cellnex, we keep raising the bar by pursuing innovative ways of working and exploring cross-sector best practices”.*

With this recognition, **Cellnex reinforces its position as an international benchmark in climate action, aligning its growth with its ambitious decarbonisation objectives and contributing to the sustainability of the telecommunications sector.**

### Cellnex’s updated short and long-term emission reduction targets validated by SBTi as of 23 December 2025

**Near-Term Targets:** Cellnex commits to reducing absolute Scope 1 and 2 GHG emissions by 70% by 2030 (2020 base year). In addition, it commits to increasing active sourcing of renewable electricity from 10% in 2020 to 100% by 2025 and maintaining this through 2030. Furthermore, 82% of its suppliers and customers, in terms of emissions, will be required to have science-based targets by 2030.

**Long-Term Targets:** Cellnex commits to reducing absolute Scope 1 and 2 GHG emissions by 90% by 2050 (2020 base year) and also reducing absolute Scope 3 emissions by 90% within the same timeframe.

### About SBTi

The Science Based Targets initiative (SBTi) is a collaboration between CDP, the United Nations Global Compact, World Resources Institute (WRI) and the World Wide Fund for Nature (WWF). The SBTi defines and promotes best practice in science-based target setting and independently assesses companies' targets.

On the 28th of October 2021, the SBTi launched the first ever science-based Net-Zero Standard. This will combat the current inconsistencies that surround net-zero targets, and allow companies to decarbonise at the pace and scale required to align with the goals of the Paris Agreement and keep 1.5C in reach.

### About CDP

CDP is a global non-profit that runs the world's only independent environmental disclosure system, helping more than 24,800 companies and 1,100 cities, states and regions disclose their environmental impacts in 2024. Financial institutions with more than a quarter of the world's institutional assets use CDP data to help inform investment and lending decisions. Aligned with the ISSB's climate standard, IFRS S2, as its foundational baseline, CDP integrates best-practice reporting standards and frameworks in one place.

### About Cellnex Telecom

Cellnex is Europe's largest telecommunications towers and infrastructures operator, enabling operators to access a wide network of telecommunications infrastructures on a shared-use basis, and thus helping to reduce access barriers and to improve services in the most remote areas, whilst also contributing to more sustainable deployment. The Company manages a portfolio of more than 110,000 sites, including forecast roll-outs up to 2030, in 10 European countries, with a significant footprint in Spain, France, the United Kingdom, Italy and Poland. Cellnex, which is listed on the Spanish Stock Exchange, is part of the selective IBEX35 and Euro Stoxx 100 and enjoys outstanding positions on the main sustainability indexes such as Sustainalytics, MSCI and DJSI Europe. Cellnex was ranked in the Top 15 of the Financial Times "[Europe's Climate Leaders 2025](#)" list, achieving 12th place out of 600 companies included in the ranking.
